35. echo "I'm SOOO sad that my fellow perscholastronauts have perished while fixing issues outside the spacecraft. With the completion of this mission we have determined that the red patches on Pluto are bruises from all the times Earth said it wasn't a planet. Oops, I mean. They're just special red pigmentation from Tholin. Pluto is also too dangerous and should not be considered a planet. We should stop looking at Pluto. Sincerely,
500internalservererror...I mean Chioma.">>mission-report.txt
